

Junction Mount	Pole Mount
PFA121	PFB121 + PFA152
 A technical line drawing showing a junction mount. It features a rectangular mounting plate with a circular base. A cylindrical arm extends from the center of the base, ending in a rectangular light fixture with a lens. The entire assembly is shown in a three-quarter perspective view.	 A technical line drawing showing a pole mount. It features a vertical cylindrical pole. A circular base is mounted on the pole, with a cylindrical arm extending from its center. The arm ends in a rectangular light fixture with a lens. The entire assembly is shown in a three-quarter perspective view.
